Leave Xm Radio alone. It is a service we as the consumer pay for and should be able to listen to what we want. As a Truckdriver I find being able to get the weather and traffic reports when I need them very helpful, because I can find out in advance when there is a problem in an area that I might be going through and avoid that area if at all possible. Causing least tie ups on the roads and possibly preventing more accidents by taking other routes to avoid bad weather.

Thank You,

Sheri Petters
